

Web Design & Development Playbook

The complete team guide — every role, page, mark and deadline in one place.

This consolidates the full coursework brief, the detailed marking scheme, the group contract and the template-file structure. Each member: read §1–§3, then jump to your own role section to see exactly what to build and where every mark sits. The building, writing and recording are ours to do.

Module: Web Design and Development — 4COSC011C (banner) / 4COSC011W (spec & contract)

Module Leader: Ms. Asini Silva

Weighting: 50% of the module · **Qualifying mark:** 30% · Tutorial Group 6 · CWK Group 4

Deliverable: one group website on a chosen UN Sustainable Development Goal (SDG)

Role	Member	IIT ID	Owns (unique pages)
Student 1	Yohan Singappulige	20250247	Template + Nav + Global CSS · Home · Gallery
Student 2	Anjana Dodammullage (coordinator)	20251335	Splash Screen · Action Impact Simulator
Student 3	Krishen Silva	20250095	Feedback & Program Directory · Team
Student 4	Sithil Hettiarachchi	20251350	User Profile · Sitemap (SVG)

Due: 20 July 2026 · 13:00 (1:00 PM Sri Lanka)

Submit on Blackboard · NO extensions · Mandatory in-class viva for everyone (miss it = zero)

Each person submits their own ZIP + the shared signed contract. Find your role: S1 → §4 · S2 → §5 · S3 → §6 · S4 → §7.

1 Read First — The Rules That Decide The Grade

Five things sink groups on this coursework. Clear these before anyone writes a line of code.

⚠ THE FIVE KILLERS

1. **Deadline = 20 July 2026, 13:00 (1:00 PM). NO extensions** — we have eight full weeks. Plan around it.
2. **The viva is mandatory for everyone.** The in-class demonstration is where you defend your own work. **Non-attendance = a mark of ZERO** for the coursework. Marks are only awarded for features you can personally explain.
3. **Late = brutal.** Within 24h / 1 working day → **−10 marks** (unless the mark is 40–49%, then capped at the 40% pass mark). More than 24h late → **ZERO**, unless an approved Mitigating Circumstances claim.
4. **Submit the Group Contract.** Required but not marked — **but missing it costs −5 marks.** Free marks; don't lose them.
5. **File names & folder structure are strict.** Wrong names break navigation and **penalise the whole team.** Use the exact names in §11.

MODULE CODE MISMATCH — DON'T GUESS ON THE COVER

The banner says **4C0SC011C** ; the spec and contract say **4C0SC011W** . Use whatever the **live Blackboard CWK page** shows. If unsure, ask Ms. Silva before committing it.

THIS IS ONLY HALF THE MODULE

The group website is **50%**. The other **50% is a separate in-lab practical** on campus (IIT) in **Week 7**, covering all module content with a focus on HTML & CSS. Both have a 30% qualifying mark. Don't tunnel on the website and walk into the practical cold.

2 Coursework at a Glance

2.1 — Module facts

Item	Detail
Assessment	Group Coursework — design & build a website on a chosen UN Sustainable Development Goal (SDG)
Weighting	50% of the module (other 50% = in-lab practical, Week 7)
Qualifying mark	30% on this component
Handed out	1 June 2026
Due	20 July 2026, 13:00 (1:00 PM SL) — no extensions
Learning Outcomes	LO1 text-editor linked HTML · LO2 separate structure/behaviour/presentation · LO3 JavaScript interactivity · LO4 group work with distinct roles
Feedback	Verbal at the viva; written feedback + marks 15 working days after the deadline (provisional until the Assessment Board)

2.2 — Three decisions the group makes FIRST

1. **The SDG** — pick one of the 17 (e.g. Quality Education, Clean Water, Climate Action).
2. **The core message & purpose** — remember the brief's rule: **focus on ACTION** (how individuals/students/communities can actually help), not just describing the SDG or copying the UN site.
3. **A consistent visual identity** (colour palette, typography, overall style), implemented through the shared template + global `style.css` that everyone uses.

Plus: agree a **5-letter team name** (used for the project folder) and give it to the tutors within the first two weeks.

2.3 — The website structure

Page tree	On every page EXCEPT the splash
Splash Screen → Home Page → branches to: └ Content Page × 4 (one per student) └ Action Impact Simulator └ Gallery └ User Profile └ Feedback └ Team Page └ Sitemap	Nav bar links to: Action Impact Simulator · Gallery · User Profile · Feedback · Team · Sitemap Footer links to: that student's Page Editor + Validation page (+ student details + accessibility/compliance link)

3 Who Builds What — Role Map

Student	Unique pages	Shared by everyone
Student 1 — Yohan	Template + Nav + Global CSS · Home · Gallery	Own Content page · Own Page Editor · Own Validation page · Integration (template + nav) · Upload to server · Weekly practice tests
Student 2 — Anjana	Splash Screen · Action Impact Simulator	
Student 3 — Krishen	Feedback & Program Directory · Team	
Student 4 — Sithil	User Profile · Sitemap (SVG)	

Jump to your section: Student 1 → §4 · Student 2 → §5 · Student 3 → §6 · Student 4 → §7. The tasks **everyone** shares (Content, Page Editor, Validation, Integration, Server, Weekly tests) are in **§8**. Everyone's grand total is the same: **40 unique + 50 common + 10 weekly = 100**.

CRITICAL PATH — THE WHOLE TEAM DEPENDS ON THIS

Student 1's template + `style.css` blocks everyone. Nobody can properly build their pages on the shared template until Yohan's is done and shared. Get it sorted in Week 2–3 or the whole team stalls.

4Student 1 — Yohan: Template + Global CSS, Home, Gallery

Three deliverables (50 unique marks). You build the foundation the whole team uses, so finish the template first.

4.1 — Template + Navigation + Global CSS · `style.css` + base template · 10 marks

The agreed layout as a reusable HTML template + one external global stylesheet, shared with everyone. Pre-made nav templates from the internet are banned.

Requirement	Marks
Base HTML template with valid structural elements: <code><header></code> , <code><main></code> , <code><footer></code> , <code><section></code> with headings (0.5 each)	2
Header has website identity/logo styled (0.5) + alt text on logo (0.5) + a <code><nav></code> integrating the nav bar (0.5)	1.5
Footer has placeholders for Page Editor & student details (0.5) + link tags to Page Editor for members to update (0.5)	1
HTML correctly linked to the Global CSS	0.5
One external Global CSS file (0.5) + defines ≥10 styles for body, header, main, footer, fonts, headings, cards/sections, links, images, colour palette (0.25 each)	2.5
Nav bar links to all main pages using the agreed file names/folder structure	0.5
Nav links styled as inline buttons (0.5) + hover effects (0.5) + active-page class/style (0.5)	1.5
Template & CSS include clear comments explaining the styles' purpose	0.5
TEMPLATE + GLOBAL CSS TOTAL	10

4.2 — Home Page · `home.html` · 10 marks

Requirement	Marks
Header has nav bar (0.5) + website identity/logo (0.5); footer has links to Page Editor & Validation (1)	2
At least three content cards/sections in <code><main></code> about the chosen subject	0.5
Each card/section has a clear heading	0.5
Each card/section has a relevant image with alt text; external images referenced	1
Card text is original, promotes goals/mission/action message, says why the SDG matters today & why it's relevant to students/local communities	0.5
At least one card has a short list/highlights (actions or outcomes); cards use the global CSS card styles	0.5
Interactive gallery linking to all four student content pages (0.5) + each item shows the page topic & fits the visual identity (0.5) + links correctly to each member's content page (0.5) + hover effect with CSS, 0.25 per style (colour, bg, size, transition)	2.5
All images have suitable alt text	0.5
Embedded <code><style></code> block with at least five Home-Page-specific CSS rules	1

Embedded CSS clearly commented + does not override/conflict with the Global CSS	1
HOME PAGE TOTAL	10

4.3 — Gallery · gallery.html · 20 marks

Uses the shared template. Interactivity must be **JavaScript** — CSS-only galleries score nothing here.

Requirement	Marks
Gallery of 4 thumbnail images related to the SDG/theme	1
Each item has a thumbnail image (0.5 each)	2
Each item has a title or label (0.5 each)	2
Each item has an extended view with additional info (0.5 each)	2
Images & descriptions relevant to the website's purpose	1
Click-to-expand the extended view using JavaScript	3
Close/collapse using JavaScript (button, toggle, or click-outside)	3
Extended view lets the user change colour scheme (2) and/or font style (2) with JS, applying only to the extended view	4
Page-specific styling (colours, typography, emphasis) that doesn't conflict with the Global CSS	1
All images have alt text; page validates & follows basic accessibility	1
GALLERY TOTAL	20

⚠ TRAP

Galleries built with CSS-only tricks (`:hover` , `:target` , checkbox hacks) **get no marks** for the interactivity. The expand/close logic must be JavaScript.

5Student 2 — Anjana: Splash Screen + Action Impact Simulator

Two deliverables (40 unique marks).

5.1 — Splash Screen · `splash.html` · 20 marks

The first screen users see. Does **NOT** need the shared template, but **must match** the agreed look & feel.

Requirement	Marks
Website title displayed prominently	1
Brief website mission (1–2 sentences) connecting to the SDG	2
All group members' names clearly listed	1
Full-screen background image that scales to fit	1
Text stays readable over the background (overlay / contrast / positioning)	2
Auto-redirect to home after 4s — redirect works (1) using an HTML meta refresh tag (2): <code><meta http-equiv="refresh" content="4;url=home.html"></code>	3
CSS loader animation — CSS only, NOT a GIF (a GIF scores only 0.5)	3
Visible JavaScript countdown timer ("Entering site in 4...3...2...1")	2
Working "Skip Intro" button → home immediately	2
Visually appealing + consistent (1) · typography consistent (1) · layout/tone match team identity (1)	3
SPLASH SCREEN TOTAL	20

⚠ TRAP

Don't use ready-made splash templates from the internet.

5.2 — Action Impact Simulator · `ais.html` · 20 marks

Users pick SDG actions and get an impact score. Uses the shared template + embedded CSS + JavaScript.

Requirement	Marks
At least six action cards in <code><main></code>	1
Each card: thumbnail image (1) + alt text (1)	2
Each card: title (1) + short description (1)	2
Each card: impact points on a clear scale (e.g. 1–5)	1
Actions relevant, realistic, original wording, external resources referenced	1
Embedded CSS (≥5 rules, commented): organise cards (1) + format bg/borders/typography (1) + selected vs unselected state (1)	3
JS: change selected/unselected visual state of a card	2

JS: track selected cards (2) + calculate total impact score from card values (2)	4
Feedback area updates dynamically to show total impact points	1
Three impact levels with thresholds in code/comments (1) + JS changes background image per level (1) + images suitable/readable/referenced (1)	3
AIS TOTAL	20

⚠ TRAP

The background change must be **JavaScript**, not a CSS-only trick. Don't replicate the example in the brief — original design.

6Student 3 — Krishen: Feedback & Program Directory + Team

Two deliverables (40 unique marks). The feedback form is heavy on JavaScript.

6.1 — Feedback & Program Directory · feedback.html · 20 marks

Requirement	Marks
Scrollable section (uses <code><iframe></code>) (1) + at least four programme/opportunity cards (1)	2
Each card: title, thumbnail image/icon (with alt text), short description, button (0.5 each)	2.5
Buttons have a clear CSS hover effect	1
A styled dropdown for sorting/filtering (does not need to be functional)	1
Overall rating summary with numeric rating, label, and total number of reviews	1
At least three review cards, each with heading/title, short text + "See more" link, reviewer name + date, rating value (0.25 each)	1.5
Form has ≥4 of: full name, email, telephone, address, message textarea (with <code>maxlength</code>), date, datetime-local, + at least one of select/multi-select/datalist; Required (0.5 each)	2.5
Uses <code>fieldset</code> (0.25) and <code>legend</code> (0.25) to group fields	0.5
Live character counter that updates dynamically as the user types (JS)	2
JS error messages for missing/invalid fields (no marks for HTML <code>required</code> alone)	2
Submission confirmation message on successful validation (JS)	2
Page-specific CSS to separate info cards, reviews & form — at least eight new rules (0.25 each)	2
FEEDBACK TOTAL	20

⚠ TRAP

The form interactivity must be **JavaScript** — the character counter, validation messages and confirmation can't be CSS-only. HTML `required` alone earns nothing for the validation mark.

6.2 — Team · team.html · 20 marks

Requirement	Marks
Four team member cards in <code><main></code>	2
Each card: thumbnail image/icon (1) + all images have meaningful alt text (1)	2
Each card: member's name (0.5) + role within the group (0.5)	1
Each card: expanded details (student role + short contribution summary)	1
Each interactive card is keyboard accessible using <code>tabindex="0"</code>	2
Page-specific styling: organise team cards (layout, spacing)	2
format background, borders, typography	1
visible focus state for keyboard navigation	2
change each thumbnail on hover with CSS to show interactivity (0.5 per change, 5 expected)	2.5
show expandable details on hover	2
smooth transitions for hover/expansion (no jump)	2.5
TEAM TOTAL	20

7Student 4 — Sithil: User Profile + Sitemap (SVG)

Two deliverables (40 unique marks). Both are JavaScript/SVG heavy.

7.1 — User Profile · `profile.html` · 20 marks

Builds a profile via JavaScript `prompt()` dialogs (not HTML forms), revealing it progressively.

Requirement	Marks
Info collected using JavaScript <code>prompt()</code> , not HTML forms	1
Prompts clear, concise, step-by-step	1
Prompt content relevant to the theme & SDG	1
At least three steps in the profile-building process	1
Each step has at least three prompts	1
Prompts grouped logically by category + clear progression	1
Structured profile output area with appropriate HTML elements for dynamic content (sections, articles, paragraphs, spans, containers per step)	1
JS dynamically updates the displayed profile as the user completes prompts	2
Extra profile sections hidden initially + revealed progressively without page reloads (DOM manipulation)	2
Dynamic progress indicator (progress bar, percentage, or step counter)	1
Progress reflects partial completion + reaches 100% when all steps done	1
Users can skip individual prompts or whole steps and still continue	2
Skipped info omitted from output + reduces completion progress	1
Users can return to skipped steps + add info later	2
When skipped prompts are later completed, output + progress update dynamically	2
USER PROFILE TOTAL	20

7.2 — Sitemap (SVG) · sitemap.html · 20 marks

A graphical sitemap built in **SVG** (not a bitmap/screenshot) showing the whole site hierarchy.

Requirement	Marks
Sitemap clearly shows the hierarchy, created in SVG (a bitmap scores only 0.5)	1
All required pages represented as nodes (Home, Content ×4, Gallery, AIS, Feedback, Team, User Profile, Sitemap)	3
Each node has a visible text label	1.5
Groups (<code><g></code>) used to assist easy manipulation	2
Nodes connected with lines/branches showing relationships	3
Each node is a clickable link to its page	2
Nodes give clear hover feedback via CSS	1
Each clickable node has an accessible name (<code><title></code> / <code><desc></code> in SVG, 0.5 each)	1
Nodes keyboard accessible (<code>tabindex="0"</code> , 0.5) + visible focus state (0.5)	1
SVG uses <code>viewBox</code> + flexible sizing to scale proportionally	2
Page-specific CSS to format the nodes — at least 6 styles (0.25 each)	2.5
SITEMAP TOTAL	20

8 Common Tasks — Everyone Does These (60 marks)

Identical for all four members. The Page Editor alone is 25 marks — don't leave it to the end.

8.1 — Content Page · content_ST#.html · 10 marks

Uses the shared template. A page on a specific topic within the SDG. Original content written by you.

Requirement	Marks
Content relevant to the theme & chosen SDG	1
Multiple sections/cards (0.5) + one main <code><h1></code> (0.5) + subheadings <code>h2/h3</code> (0.5)	1.5
Sections have unique target <code>id</code> values	0.5
Internal navbar (0.5) + labelled organised links (0.5) + links work to sections (0.5) + styled (0.5)	2
"Go to Top" button included (0.5) + links to top via internal anchor (0.5)	1
"Go to Top" has hover effect + stays visible while scrolling (CSS positioning)	0.5
At least four relevant images	1
Images styled with CSS — spacing/borders/shadows/responsive (0.25 each)	1
All images have meaningful alt text	0.5
Content CSS extends the global CSS for content-specific elements	1
CONTENT PAGE TOTAL	10

NOTE

The "Go to Top" button is **HTML + CSS only** — no JavaScript needed.

8.2 — Page Editor · pageEditor_ST#.html · 25 marks — biggest single task

A technical + reflective report on **your own** pages. Do **not** document the Page Editor or Validation page themselves. Start from the Blackboard template (§10).

Requirement	Marks
Your name + role (0.5) + concise list of tasks/pages completed (0.5)	1
Per page — explain the HTML structure (key tags + purpose)	4
Per page — explain the CSS techniques (layout + styling decisions)	4
Per page — explain the JavaScript used for interactivity	4
Links to your actual live pages (open in a new tab)	0.5
Link to your validation page (0.5) + targeted to the matching section (0.5)	1
Reflection — challenges & lessons learned	1.5
Accessibility — clear, accurate info specific to your pages	2
JANET compliance — how your pages comply	2
Group Meetings & Individual Contribution Log (min 6 meetings, table, your own contribution each)	3
References — all resources consulted, consistent style, in-text + linked	2
PAGE EDITOR TOTAL	25

NOTE

For S1 the JavaScript marks come from the Home gallery + Gallery page; S2 from Splash + AIS; S3 from the Feedback form; S4 from User Profile + Sitemap interactivity. Explain — don't paste large code blocks. The Page Editor doesn't need to match the website's design.

8.3 — Validation Page · validation_ST#.html · 5 marks

W3C validation evidence for **your own** pages (not the Page Editor or Validation page). Start from the Blackboard template (§10).

Requirement	Marks
Validation screenshots (0.5 × 3 of your pages)	1.5
Reflection on each validation report (0.5 × 3)	1.5
Link to your Page Editor (1) + targeted to the matching part (1)	2
VALIDATION TOTAL	5

Which three pages each person validates

Student	Validate these three
S1 — Yohan	home.html · gallery.html · content_ST1.html

S2 — Anjana	<code>splash.html</code> · <code>ais.html</code> · <code>content_ST2.html</code>
S3 — Krishen	<code>feedback.html</code> · <code>team.html</code> · <code>content_ST3.html</code>
S4 — Sithil	<code>profile.html</code> · <code>sitemap.html</code> · <code>content_ST4.html</code>

VALIDATION MUST SHOW

the page/file name + a **successful** result (no errors). Warnings OK. Fix all errors before screenshotting.

8.4 — Integration (template + nav bar) · 5 marks

Requirement	Marks
Shared template used correctly: header (nav + logo), main, footer, sections — 0.5 each	2
Navbar links work with the agreed file names/folder structure (correct even if a target page isn't built yet)	1
Active-page styling correct on your nav-using pages	1
Footer updated: link to your Page Editor + Validation/accessibility info — 0.5 each	1
INTEGRATION TOTAL	5

Note: the marking sheet's "active page" line is correct for S1 (generic) and S3 (Feedback & Team) but has copy/paste typos for S2 ("Home Page & AIS") and S4 ("Feedback & Team"). In practice: each of **your** nav-using pages should highlight itself as the active page. (The splash has no nav bar.)

8.5 — Uploaded to Server · 5 marks

Requirement	Marks
Whole site uploaded to the server; all pages run smoothly with the correct folder structure	5
SERVER TOTAL	5

8.6 — Weekly Practice Tests · 10 marks

The gamified escape-code tests (Weeks 1–5), 1 mark each (5 total) scaled $\times 2 = 10$. **3 attempts each**; all stay open until the final cutoff **6 July 2026**. You need **VPN** access (UOW intranet) to do the tutorials.

Test	Marks	Test	Marks
Week 1	1	Week 4	1
Week 2	1	Week 5 (final cutoff 6 July)	1
Week 3	1	Scaled $\times 2$	10

9 The 100-Mark Structure (same for everyone)

Block	What's in it	Marks
Individual tasks	Your two/three unique pages (see §4–§7)	40
Common tasks	Content Page	10
	Page Editor (report + meeting log)	25
	Validation Page	5
	Integration (template + nav)	5
	Uploaded to server	5
Weekly tests	Weekly practice tests (Weeks 1–5, ×2)	10
TOTAL PER STUDENT		100
Group Contract not submitted		–5

WHERE THE MARKS REALLY ARE

For every role, the Page Editor (25) + your two big pages = the bulk of the 100. The Page Editor is pure writing/evidence — easy, reliable marks if you don't rush it. Validation (5) + Integration (5) + Server (5) are quick wins once your pages exist.

10 The Blackboard Template Files (PageEditor + Validator zip)

Blackboard provides a starter zip for the Page Editor + Validation pages. Build from these — don't start from scratch.

File / folder in the zip	What it is / what you do
pageEditor_ST0.html	Page Editor template. Rename → <code>pageEditor_ST#.html</code> (your number) and fill with your content.
validation_ST0.html	Validation page template. Rename → <code>validation_ST#.html</code> .
css/ pageEditor_validator.css	The stylesheet for those two pages. Keep it linked.
validationSnapshots/	Folder for your validation screenshots (<code>validation_splash.png</code> is the example inside). Drop your three screenshots here.
coverage/	Supporting/coverage assets folder that ships with the template.

11 File Naming & Folder Structure (penalties if wrong)

Project folder: named the **5-letter team name**. External stylesheet: `style.css` in the CWK folder. Exact page file names:

Page	File name	Owner
Home	<code>home.html</code>	S1
Gallery	<code>gallery.html</code>	S1
Splash Screen	<code>splash.html</code>	S2
Action Impact Simulator	<code>ais.html</code>	S2
Feedback	<code>feedback.html</code>	S3
Team	<code>team.html</code>	S3
User Profile	<code>profile.html</code>	S4
Sitemap	<code>sitemap.html</code>	S4
Content pages	<code>content_ST1.html</code> · <code>content_ST2.html</code> · <code>content_ST3.html</code> · <code>content_ST4.html</code>	each
Page Editors	<code>pageEditor_ST1.html</code> ... <code>pageEditor_ST4.html</code>	each
Validation pages	<code>validation_ST1.html</code> ... <code>validation_ST4.html</code>	each

⚠ WHY IT MATTERS

Wrong file names break the navigation bar across the whole site — which penalises **everyone**, not just the person who named the file. Agree the folder structure early and stick to it exactly.

12 The Group Contract (–5 if missing)

Required but not marked — yet missing it costs the group 5 marks.

- Module: **Web Design and Development** · code `4COSC011W` · get it from the Blackboard **Assessment folder**.
- Fill the **Roles table**: each member's name + ID next to their assigned role.
- **Contribution rating**: every member rates every member (including themselves) 1–5 — 5 = Excellent (exceeded), 4 = Good, 3 = Average, 2 = Poor, 1 = Very Poor.
- **All four members sign** (type name) + date.
- Submit it as part of the coursework package.

GROUP ACCOUNTABILITY

Hold at least **six group meetings** and log them (each person keeps their own contribution record for the Page Editor). If a member doesn't contribute, the group reports it to the seminar tutor, who can dock that person's marks. Everything gets integrated into one working site before the viva.

13 Cross-Cutting Rules (every page, everyone)

Rule	What it means
Code comments	Comment your HTML, CSS and JS clearly throughout — explained in the Page Editor and expected in the code.
Validation	Every page passes W3C with no errors (warnings OK). Evidence goes on your Validation page.
Accessibility	Meaningful alt text on all images, semantic HTML, keyboard access where relevant, accessibility info in the footer.
JANET compliance	Explain in your Page Editor: appropriate/ethical content, responsible use of external resources, academic integrity.
Content originality	Do NOT copy from the UN SDG website. Original, action-focused content only.
No internet templates	The splash and the nav bar must be the team's own — pre-made nav templates are banned.
Images / logo	Royalty-free is fine (e.g. iStockPhoto) but must be referenced .

14 Timeline — Work Back from 20 July

When	Do this
Now (Wk 2–3)	Lock the SDG + visual identity + 5-letter team name. Sign & submit the Group Contract. Yohan ships the template + <code>style.css</code> to everyone. Keep doing the weekly tests. Start logging group meetings.
Wk 3–4	Everyone builds their unique pages on the shared template. First milestones reviewed in a group meeting.
Wk 5	Everyone builds their Content page. Finish all weekly tests (final cutoff 6 July).
Wk 6	Validate your pages (W3C) → screenshots into validationSnapshots/ → build your Validation page. Write your Page Editor (the big 25-marker).
Wk 7 (≈ by 18 Jul)	Integrate all four members' work into one site, upload to server, test every nav link from every page. Rehearse the viva. Submit ZIP + signed contract at least a day early.
Also Wk 7	The separate in-lab practical (50%) on campus — revise HTML/CSS for it.

15 Final Checklist

Each member's ZIP (correct folder structure)

- ☐ Your unique page files (S1: `home` , `gallery` + template/ `style.css` · S2: `splash` , `ais` · S3: `feedback` , `team` · S4: `profile` , `sitemap`)
- ☐ Your `content_ST#.html`
- ☐ Your `pageEditor_ST#.html` (name/role, per-page HTML+CSS+JS write-ups, links, reflection, accessibility, JANET, 6+ meeting log, references)
- ☐ Your `validation_ST#.html` (W3C screenshots for your 3 pages + reflections + link to your Page Editor)
- ☐ Shared `style.css` + your images/assets · `validationSnapshots/` with your screenshots

Group (everyone makes sure these happen)

- ☐ SDG + visual identity + 5-letter team name agreed (and name given to tutors)
- ☐ Template + `style.css` shared with everyone (S1)
- ☐ Signed Group Contract (all 4) submitted
- ☐ 6+ group meetings held and logged
- ☐ All four members' work integrated into one working website before the viva
- ☐ Everyone present at the mandatory viva

Traps cleared

- ☐ Submitting before 20 July, 13:00
- ☐ File names exact (§11)
- ☐ All pages W3C-valid (no errors)
- ☐ Interactivity is JavaScript where required (Gallery expand/close, AIS scoring + background, Feedback form, Profile prompts) — not CSS-only
- ☐ Splash loader is CSS (not a GIF)
- ☐ No copied UN content · no downloaded templates · all images referenced
- ☐ Weekly tests 1–5 done (final 6 July)
- ☐ Module code on cover matches the live Blackboard page

Contact: Module Leader — Ms. Asini Silva. Questions on the contradictions (module code, the "27 July tentative" vs "20 July" dates) → confirm on Blackboard before committing them to the submission. This playbook consolidates the brief, the detailed marking scheme, the contract and the template-zip structure; the live Blackboard pages always win if anything changed after this was made.
